MINES AND MINING YAMPA SMELTER

anargite, similar to that in some of the rich veins on Amaconda hill.

The Anaconda mine is up to its normal high state and all other properties look equally as well as at any time in recent years, with the exception of the Parrot, in which no work is being done at present. Development work in all the properties is up to the average, and the new work, which had been temporarily suspended during the engineers' strike, is being pushed as rapidly as formerly. This includes shaft sinking at the Gagnon, Badger State and Belmont. The new Gagnon shaft, which is to take the place of the old incline, will be a vertical shaft, and one of the largest in the district. It is now down nearly 600 feet and will be carried to a denth of 2.300 feet, where connections will be made with the workings at that depth, and the old shaft will be viewed for all and a safety opening. be used for air and a safety opening.

Explore Badger State.

The Badger State, a Boston & Montana property, is down about 1,700 feet, and will be put 100 feet deeper, after which the ground will be opened and explored. The Badger State claim is sup-

At the Washoe and Great Falls smelters, a number of important improvements are being made, looking toward greater economies. At Great Falls investigations are also being made preliminary to an enlargement of that plant.

General Situation Good.

contentment that I had not seen here for districts before July 1, 1910.

ation in Butte, he said: "I believe that the present comparatively low price of copper is due to the fact that the increased production was thrown on the market immediately after the panic, at a time when consumption amounted to little or nothing. The accumulation is being gradually absorbed, and that, with the demand for conner in new lines such electrification of the eastern terminals, will gradually bring the price of the metal back to a point at which it belongs. The outlook is good and improv-

BELIEVE MERGER WILL INCLUDE CLARK MINES

Butte, Mont., April 10 .- The report from the east that the Anaconda merger will take in the W. A. Clark properties in Butte is believed in Butte to be true. There have been vein controversies be-tween the Amalgamated and Clark, which have resulted in the shutdown of the Stewart mine, one of Clark's hig producers, he having closed it voluntarily. Several years ago the Amalgamated offered to buy Clark's mines and thereby settle their controversies, practically agreeing to pay him what he asked. A price was agreed on but before the deal was closed Clark, so report has it, doubled his price and the deal was off. If he sells now it will be for considerably less than he was offered for his properties several years

New Ore in Cld Mines.

In the High Ore and Diamond mines new ore bodies have been opened on some of the old levels from the 1,800 to ing like it had ever been worked belore; new discoveries. This ore is of a high grade. "Nothing like it had ever been developed before at the same depth," said President Thayer. The significance of these new of the High Ore and Diamond mines, they were on the old levels, and in the Gag. on the strike was made at a depth where it was hardly expected, and under conditions that upset all geological theories. The Gagmon ore is characteristic anargite, similar to that in some of the rich yelns on Amaconda hill.

The Anaconda mine is up to its normal high state and all other properties look of the Company were exhausted, and there was no treasury stock. About two years ago, after Mr. Peery's loo of the world's already not the world's already to the world's already to the more of company were exhausted, and there was no treasury stock. About two years ago, after Mr. Peery's loo of the same depth as the tunnel.

"The question is frequently asked mery Shoshone, at the same depth as the tunnel.

"The funds of the company were exhausted, and there was no treasury stock. About two years ago, after Mr. Peery's loo of the same depth, as pecial meeting of stockholders was present and it was often the porphyry mines will not demoralize the porphyry mines will not demoralize the porphyry mines will not demoralize the porphyry make good the deficiencies of the mines that are reluctantly compelled to confess, and in the Gag. on the strike was made at a depth where it was hardly expected, and under two years ago, after Mr. Peery's death, a special meeting of stockholders was present and it was often the porphyry mines will not demoralize the amount of \$250,000 and additional stock to from prevalent throughout the country at that it are reluctantly compelled to confess and the country at the amount of \$250,000 and additional stock to the more of the amount of \$250,000 and additional stock to the more The porphyry mines now in process of de-still unshaken, a shaft was sunk in anothvelopment were started two or three years ago, and no new ones are being discovered. In the meantime, some of the old silk stocking favorites are falling by the wayside."

The porphyry mines now in process of development, a latter way such in the derivative which was designed to tap the ore body in the Montgomery Shoshone mine, which, if continuous on its dip, should be tapped in this shaft. At the depth of 100 feet in the

OF MEXICAN LAWS

Call for Vigilance on Part of Mine Owners to

lucky owner to be some day dispossessed unwittingly of his property and subject to a heavy fine and imprisonment. Among other changes he calls attention to the following:

In addition to the satisfaction President Thayer expressed regarding the mining situation and the condition of the properties, he was especially pleased over the labor situation in Butte. "I find conditions in Butte in that respect very much improved," he said. "There is a spirit of improved," he said. "There is a spirit of the commencement of the new law must be registered in their respective districts before July 1, 1910. alty of forfeiture. Titles issued prior several years."

Speaking about the general metal situation in Butte, he said: "I believe that the present comparatively low price of mine owners to build substantial monuments. Under the new law no title is issued until such monuments

have been placed on the ground.

Properties titled under the old law must have monuments built on the ground before January 1, 1911, or the the demand for copper in new lines, such as the electrification of western railways, the hydro-electrical installations, the electrification of the eastern terminals, will gradually bring the price of the metal back to a point at which it bein the penitentiary.

Any one removing ore from a mining claim before the title to the same has been granted suffers the same penalty and the forfeiture or loss of ne property.

Legal questions pertaining to mining properties will be decided by the fed-eral court, and all old cases pending in the state courts concerning mining rights will soon be transferred to the federal courts.

As the former privilege of unlimited exploration zones was much abused, the new law has reduced the area of he exploration zone to a radius of 00 meters about an easily distinguishable point as a center. "These are only a few of the radical changes made which it behooves in-restors in mines in Mexico to heed,"

COMBINATION IN COPPER. Indications of Ore Body in East Tin-

tic Mine. Provo. April 10.—B. H. Bullock, of the Tintic Combination Mining company, has been informed by Superintendent Duncan that the east drift from the company's shaft has broken into stringers of copper quartz, with favorable indications for the early uncovering of a body of ore. Superintendent Andrew N. Holdaway reports having struck the contact in Tinreports having struck the contact in Tin-tic Central, the shaft being in iron-man-ganese ore similar to that on the contact

n the Iron Blossom mine. DISCOVER COPPER IN ELKHORN MOUNTAINS

A ledge of fine looking copper ore was scovered in the east Elkhorn mountains last week by Ed B. Jones and David M. Williams, and since news of the find has been made public a number of Malad men have been out prospecting in the vicinity of the find and many claims have been taken, says the Malad, Idaho, Enterbeen taken, says the Malad, Idaho, Enterprise. In times past a number of croppings have been found in this neighborhood that gave high assay values, but until the discovery of Messrs. Jones and Williams, the ledge could not be located. These gentlemen say that the ledge is very clearly defined on the surface, and they are confident that they have a value. These gentlemen say that the ledge is very clearly defined on the surface, and they are confident that they have a value.

uable prospect.

CROWD WILL BE LARGE. To accommodate the many people who will attend the land drawing at Lynndyl, Utah, the SALT LAKE ROUTE will run a special train, leaving Salt Lake City 7:30 a.m., Monday, April 11. Round trip \$5.05.

onfidence in the merits of the property shaft, a crosscut was run for some distance and some values were encountered but not of high enough grade to consti-tute commercial ore. Machinery for oper-ating this shaft was negotiated for, and the property was surveyed and patented. Taxes have also been paid, and every effort made by the directors to protect the property and guard the interests of the

'The money for this work was advanced the company by the bank referred to in our previous letter, and others, and was used for this purpose alone, honestly, judiciously and economically. There were no salaries paid any of the officers of the corporation, and the directors gave their time and talents for the interests of the stockholders, without compensation.

"As stated in the former circular the creditors pressed their claims and your recorranging tion committee deemed it proposes." explored. The Badger State claim is supposed to carry the extension of the Jessel vein of the North Butte company, but that is not certain, as there are a large number of veins in that neighborhood. The Belmont shaft, which is being sunk in the southern part of the Butte district, and is being connected with the Anaconda mine workings, is being deepened with as much vigor as ever, and is now down about 1,450 feet. Connections have been made with some of the upper levels, but aside from stopping to cut stations, the sinking operation will not be interrupted until the shaft reaches a depth of 2,460 feet. The Belmont will be used in connection with the mining of the hill properties.

NIMIC UWNETS to

AVOID LOSS.

A leading mining engineer from Mexico, but the southern part of the butte district, and is being connected with the Anaconda mine workings, is being deepened with as much vigor as ever, and is now down about 1,450 feet. Connections have been made with some of the upper levels, but aside from stopping to cut stations, the sinking operation will not be interrupted until the shaft reaches a depth of 2,460 this they are in great danger of losing their mines, says the El Paso Heard.

Many of the corporation, and the directors gave their time and talents for the interests of the stockholders, without compensation.

"As stated in the former circular the creditors pressed their claims and your reorganization committee deemed it property and honorable that the opportunity should at least be afforded all stockholders, to avail themselves of the plan proposed for the redemption of the property and provision for sufficient tunds to demonstrate the existence of the Montgomery Shoshone ore body in our ground.

"We, ourselves, are large stockholders, and have sufficient confidence in the meritance of the stockholders, without compensation.

"A leading mining engineer from Mexico, but the old-time mine owners as well, to secure copies of the new mining code of Mexico and study the new law.

"We, ourselves, are large tork seek the reorganization of the company and ask you to join with us in proportion

IN THE DISTRICT COURT, PRO-bate division, in and for Salt Lake county, state of Utah. In the matter of the estate of Arthur Brown, de-ceased.—Notice.

The petition of Max Brown, executor of the estate of Arthur Brown, deceased, praying for an order to lease real property of said decedent, and that all persons interested appear before the

been employed in the county before. He said arrangements were being made by his company for the immediate shipment to the mesa of a 50-ton stamp mill, to be used in connection with the placer mining. The richest values on the mesa according to Mr. Inman, are in quartz deposits and a mill is necessary to work the quartz. The land runs from 25 cents to 87½ cents a yard, none of it running under 25 cents.

Placer mining has been going on in the mesa for the past three years, and evidence has been shown of rich quartz deposits. Inman claims that his company has found these deposits.

The Inman and Wilder interests have consolidated with the owners of the Black Cat group of placer claims.

Webb & Boren have practically completed a sale of half of their placer hold.
